GEOMETRÍA Y AGUA DE MAR CODIFICADA

A practical and effective implementation of the [77 Códigos Geocrom](#) (77 Geochrom Codes) is by ENCODING substances. We impregnate several specific formulas, of geometric and chromatic codes, in a stable and nutritious liquid, such as **seawater** or **salts**, or in a substrate such as **essential oils**. Nowadays we can heal ourselves 'drinking' sacred geometry and color by encoded seawater, or 'impregnating' our body or chakras with encoded therapeutic oils. It is a way to incorporate light geometry in our psyche-soul, physical, energy and mental health.

Fisterra is a pioneering platform that combines geometry, color and seawater to produce great and effective psychic-soul remedies.

The researcher Masaru Emoto has clearly shown us for years that *'information' can encode water*, and be memorized, stored and used for health and human evolution. Our body is composed of 70% water and it resonates in perfect synergy with water treated energetically. This principle of re-encoding and impregnation is already used for decades in homeopathy, spagyrics and other medical practices.

Since 2011, the alchemical work of Marta Povo at CSIS Garden laboratory, is aimed to new uses of Geochromotherapy, by impregnating and consecration (*) of water, salts and alchemical oils. This work is expanded and distributed by the invaluable assistance of [Esther Beltrán](#).

(*) Consecrate, beyond the ancient religious connotations, is nothing more than the act of *assigning a code*, a greater force, is to boost or amplify the energy of something, any substance. Consecrate it is usually understood as bless, purify and strengthen. It is to change its frequency as more subtle....
